

Package ‘tinycodetfakepkg1’

September 21, 2026

Title What the Package Does (One Line, Title Case)

Version 0.0.0.9000

Description What the package does (one paragraph).

License `use\_mit\_license()`, `use\_gpl3\_license()` or friends to pick a license

Encoding UTF-8

Roxygen list(markdown = TRUE)

Enhances tinycodetfakepkg3

Config/roxygen2/version 8.0.0

Contents

tinycodetfakepkg1 1

Index 3

tinycodetfakepkg1	<i>tinycodetfakepkg1</i>
-------------------	--------------------------

Description

Bla

Usage

fun_overwritten()

fun11()

fun12()

X %opover% A

X %op11% A

X %op12% A

```
rpbase_overwritten(x)

rpbase11(x)

rpbase12(x)

rpbase_overwritten(x) <- value

rpbase11(x) <- value

rpbase12(x) <- value

const_overwritten

const11

const12
```

Arguments

X	whatever
A	whatever
x	description
value	description
