

Package ‘tinycodetfakepkg3’

September 21, 2026

Title What the Package Does (One Line, Title Case)

Version 0.0.0.9000

Description What the package does (one paragraph).

License `use\_mit\_license()`, `use\_gpl3\_license()` or friends to pick a license

Encoding UTF-8

Roxygen list(markdown = TRUE)

Depends tinycodetfakepkg1

Imports tinycodetfakepkg2

Config/roxygen2/version 8.0.0

Contents

tinycodetfakepkg3 1

Index 3

tinycodetfakepkg3	<i>tinycodetfakepkg3ellaneous functions to help your coding etiquette</i>
-------------------	---

Description

Bla

Usage

fun_overwritten()

fun31()

fun32()

X %opover% A

X %op31% A

```
X %op32% A
```

```
rpbase_overwritten(x)
```

```
rpbase31(x)
```

```
rpbase32(x)
```

```
rpbase_overwritten(x) <- value
```

```
rpbase31(x) <- value
```

```
rpbase32(x) <- value
```

```
const_overwritten
```

```
const31
```

```
const32
```

Arguments

X	whatever
A	whatever
x	description
value	description
